

Automating enterprises financial data
management and analytics

Problem

- **Paper and Spreadsheets** are used to manage financial data
- **Price** is an important factor
- **Complexity** is a barrier for non-specialized managers

“In terms of IT, SME businesses are
consumerized by the people
but not yet by the Internet”

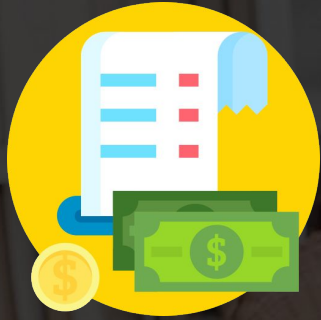

Thomas Stafford

DST Global

#10 Forbes Top Tech Investors 2019

Solutions

Automatic invoice collection
and categorization

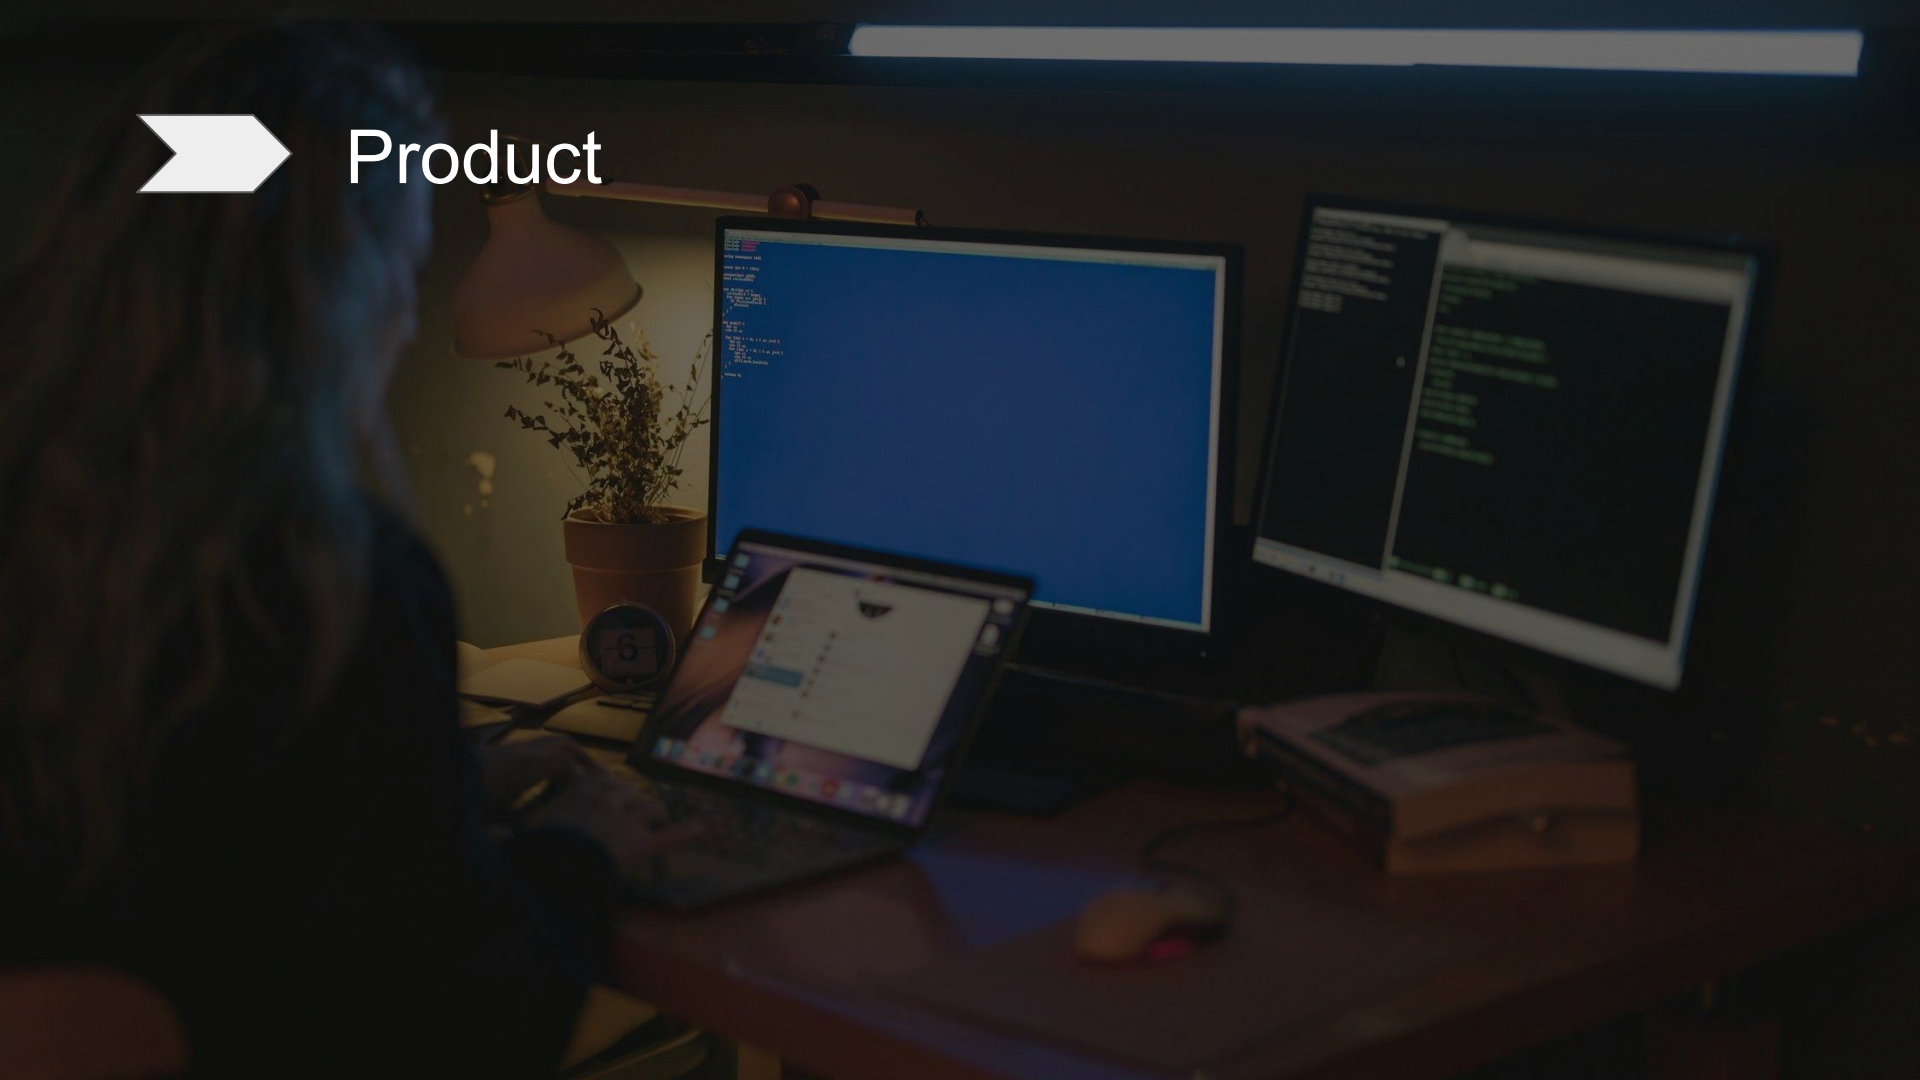

Save time and money
reducing repetitive tasks

Improve business analytics
and decision making

“Your business will thrive if it helps companies better **understand all the data they have** and I think this has been a holy grail for a long time.

Companies want to be **data-driven**. They want their employees to be able to **ask questions and get factual answers.**”

Frank Bien

Looker, President & CEO

Competitive Advantage

Data insights, recommendations
and personalization with
Machine Learning

Simplification of bank
reconciliation and accounting
information export

Automated and human
error-safe processes on
